

REMARKS

New claims 20-23 have been added. These new claims emphasize the use of three points to determine a waveform which is compared with a minimized Fourier expansion difference being used to set display frame data. Claim 20 particularly emphasizes a light emission timing waveform, claim 22 a luminance waveform and claim 23 a display period waveform. The prior art of Mikoshiba and Matsushiro do not teach or suggest such features. It is submitted that these new claims distinguish over the prior art.

If any further fees, other than and except for the issue fee, are necessary with respect to this paper, the U.S.P.T.O. is requested to obtain the same from deposit account number 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
